

COOLBOOK 8.1

Your guide to innovative
commercial refrigeration
products and services.

DEPEND ON US
TO BRING IT ALL TOGETHER

"I manage 11 busy kitchens, with up to 4500 people to feed. When it comes to refrigeration, I work with SKOPE because they understand the requirements of chefs and deliver durable products and solutions that allow me to focus on the business."

Michael Fletcher Executive Chef
Gold Coast Convention Centre

YOU CAN DEPEND ON US BECAUSE WE ARE FAMILY

SKOPE is a family owned company with an international reputation for innovative design and manufacturing.

At SKOPE, we are proud of our family heritage, and as we move into the next generation of management, we continue to design and manufacture the high quality commercial refrigeration and heating products that have earned us our international reputation.

Our story began 45 years ago, with a vision to build a brand that could not only be relied on for its high-quality, innovative designs and manufacturing excellence, but that would evolve and develop as the needs of our clients changed and grew.

At SKOPE, we know how important it is to look after our customers' individual requirements, just as one nurtures family. We do this by offering exceptional sales support that continues long after your SKOPE products have been installed. When you work with SKOPE, we consider you a part of our extended family, and look forward to a relationship that will develop into the future.

At home in Christchurch, New Zealand, we employ more than 385 staff at our design and manufacturing plant, and have a team of 15 sales people in Australasia. Our dedicated staff are an integral part of our company, and it is their skills and knowledge, plus our innovative approach, design excellence, and modern technology and production lines, that combine to bring you the best commercial refrigeration and heating products.

"Our business is about more than selling you products; for us, the desire to provide a level of unrivalled customer service that ensures the smooth running of your business is imperative. Today, we still hear from customers who are using SKOPE products they bought 30 years ago. This past success gives us confidence in our future direction. We welcome our new customers to the SKOPE family, and look forward to building on existing relationships for decades to come."

R. Guy Stewart, Managing Director

Robert Stewart Chairman of the Board
Alexandra Stewart Creative Director
R. Guy Stewart Managing Director

YOU CAN DEPEND ON US BECAUSE WE ARE MADE LOCALLY

Innovative Design & Engineering

"SKOPE's designers and engineers are a highly qualified and experienced team, who work with every aspect of commercial refrigeration and foodservice. Our talented people are continually researching and observing the requirements of customers to define and develop SKOPE's market leading products. Our integrated approach to the design and engineering processes results in products that are both aesthetically appealing and highly functional."

Alexandra Stewart, Creative Director
M.Des, B.E(Elec)Hons

Craftsmanship Beyond Comparison

Innovative design principles, the highest quality of materials and state-of-the-art manufacturing technologies are combined to create refrigeration and heating products that withstand the tests of time and exceed customer expectations.

Our products are assembled by highly skilled fabricators, who know their products intimately and are passionate about their craft. Combining the latest in manufacturing machinery with handcrafted components, we monitor our products every step of the way. Each and every product is quality assured, and no item leaves our factory floor until it has been individually tested for performance and safety.

International Reputation

"With the largest design and innovation centre of its kind in Australasia, SKOPE has gained a global reputation for producing the best performing and highest quality products in our markets. Manufactured at our modern production facilities in Christchurch, New Zealand, our products are unsurpassed in their design and engineering features, which results in the outstanding reliability and whole of life performance SKOPE is renowned for. It is these attributes, combined with our global partnerships and dedication to after sales service, that make SKOPE the right choice for you."

Garth Mitchell, Commercial Manager
MBA, B.E(Mech)

Our manufacturing standards produce superior products every time: without exception.

Visitors to our factory in Christchurch are continually overwhelmed by both its size and the smooth manner in which it runs. Like our clients, running an efficient and effective operation is one of the key drivers behind our success. It is our combination of the best equipment, high quality materials, and skilled staff that results in product perfection time and time again.

No product leaves our factory before it has undergone rigorous testing, which means you can be rest assured that when your new products arrive they are exactly what you ordered, and more. Safety is paramount to SKOPE, both when it comes to ensuring the health and wellbeing of our team, and yours. From design and engineering through to manufacturing, we strive to improve the energy efficiency and sustainability of both our products and our manufacturing processes.

"We are not only passionate about our products, we're also passionate about our customers, their business requirements and goals"

Craig Plunkett, Regional Account Manager

From design phase through to completion, SKOPE's knowledgeable salesmen will work with you to gain an in-depth understanding of your business needs. We recognise the unique qualities of our individual customers, and will tailor a solution to suit your requirements. SKOPE works with you every step of the way.

At SKOPE, we design and manufacture refrigeration products that enable chefs and others in the hospitality and retail sectors to shape the future of the food and beverage industry. As many of our sales team are former chefs themselves, our expertise in this highly specialised area sets us apart from our competitors. We have been trained to solve problems on the go, and to work in stressful situations to get the job completed to deadline.

YOU CAN DEPEND ON US BECAUSE WE HAVE OUR OWN DEDICATED PROJECT TEAM

"The SKOPE network and philosophy means we treat all our customers with respect and integrity, and strive to ensure that the job is completed to the highest level for both parties"

Brady Wiseman
National Sales Manager, Food Services - Australia

Superior Client Understanding & Technical Advice

Our sales team know our products inside and out, and are experts at passing this knowledge on to our clients. We believe that the best relationships are built on mutual understanding, and we won't recommend products until we understand your business requirements in their entirety.

Professional Process - From Conception to Completion

We start at the very beginning, working with you, and your team; architect, suppliers, contractors, builders and caterers, to establish the right SKOPE solution for your business. Maintaining regular contact with our clients throughout the process ensures we keep on track with design changes, and when our products arrive, we'll make sure they don't just meet your requirements, our aim is to exceed your expectations.

Expert Product Training

Once your SKOPE products have been installed, our team will train your team to ensure you are getting the maximum benefits from our products. We're with you every step of the way, and any questions that might arise after the job is complete will be dealt with by SKOPE's dedicated customer service team.

Keeping Pace With Your Business Needs

The food and beverage world moves at a rapid pace, where efficient time management is crucial and now means now. Once we have ascertained your requirements and specifications, our project team will present a solution, complete with comprehensive quote and delivery timeframe.

Industry Trusted Time & Time Again

"What other brand is there in refrigeration!" is just one example of the positive feedback SKOPE receives from its customers. With more than four decades of manufacturing commercial refrigeration products behind us, and the only company in foodservice to have a dedicated project team, we are leaders in our industry. But don't take our word for it; take time to read the case studies that follow to hear feedback from our existing clients.

YOU CAN DEPEND ON US BECAUSE WE STAND BEHIND OUR WARRANTIES

Invest in quality for your business, and back it with our comprehensive extended warranty programme for complete peace of mind.

Maintenance

The owner's responsibilities are limited to ensuring the following basic conditions are fulfilled:

- Maintain the SKOPE products in accordance with the preventative maintenance schedule with routine maintenance and cleaning.
- All major maintenance work must be performed by an authorised SKOPE service provider.
- All safety information must be adhered to correctly.

Failure to comply with the above requirements may cause cancellation of the SKOPE standard and extended warranty.

Parts

With a SKOPE extended warranty you have complete peace of mind, knowing that your premium cabinet will be repaired by trained technicians using only genuine parts.

SKOPE Warranty Extension

All SKOPE 2 year warranty programmes can be extended to 3 years and all SKOPE 1 year warranty programmes can be extended to 2 years.

For full warranty terms and conditions please visit www.skope.com.au.

EXTENDED WARRANTY PROGRAMME

We design your SKOPE cabinets to provide many years of uninterrupted performance. However, even a SKOPE product can be subject to the rigours of time. That's why we offer an extended warranty programme for added piece of mind. For cabinets in situations such as bakeries, which require higher levels of servicing an extended warranty is advised.

All cabinet warranties (excluding some custom cabinets and Irinox cabinets) are eligible to be extended by 1 year at the time of purchase or cabinet registration on purchase of a SKOPE Warranty Extension.

For further information on our maintenance and warranty programmes, please contact your dedicated SKOPE dealer or contact SKOPE on 1800 121 535 or 0800 947 5673.

At SKOPE, we stand behind our commercial refrigeration products because we know they are the best. Your refrigeration solutions play an integral part of your business performance, which is why it is imperative that you maintain them on a regular basis. On pages 122-123 you will find comprehensive instructions detailing correct maintenance procedures. In addition to implementing a preventative maintenance programme, we also encourage you to enjoy the increased performance and reliability of your products by choosing a SKOPE Extended Warranty Programme.

YOU CAN DEPEND ON US FOR REFRIGERATION AND FOODSERVICE IN YOUR BUSINESS

Expansive Product Range & Value

We continue to enhance the quality and performance of the SKOPE range, to give you the best value options available in the market. Our standard and premium range options, and the individual product categories within each range, enable you to build a refrigeration solution to suit your business and budget.

Unrivalled Performance

SKOPE is proud to lead the way in the development of commercial refrigeration and foodservice products:

- We use smaller, more powerful, higher performing fan motors that result in outstanding chilling and maximum energy efficiency to give you greater savings
- Our patented cross-flow ducting design, and a raft of other design and engineering features, are combined to create our superior product range
- Since the 1990's SKOPE has been using a "green" blowing agent injected polyurethane in our high tech foaming plant with very low environmental impact
- SKOPE is certified to ISO 9001 quality standards, ensuring you always receive the best quality products

Leading Energy Efficiency & Sustainability

- SKOPE's products will give your business lower operating costs through greater energy efficiency
- Greater energy efficiency means you are reducing your impact on our natural environment
- A SKOPE refrigeration cabinet made today can use around half of the energy used by a cabinet made ten years ago
- By using CFC-free refrigerants, our products are designed to perform optimally, while simultaneously reducing greenhouse gas emissions
- Our glass merchandiser refrigeration products are all "MEPS" tested (a mandated standard of minimum energy efficiency ratings, called Minimum Energy Performance Standards)
- Many of our products qualify for the MEPS 'High Energy Efficiency' rating, which are highlighted for you in this Cool Book by a High Energy Efficiency tick. For a complete list of SKOPE's registered products, visit www.energyrating.gov.au/crmenu.html

Customisation

Our team are not afraid of challenges and do not shy away from outside of the square projects. We have a specialised team on the floor in our factory that will customise any product from our Cool Book to suit your exacting specifications - it may be a change in dimensions, revised lighting, alternative colour or a variant in terms of doors. Our dedicated Project Team will work with your architect or contractor to achieve your design vision. Speak to our Project Team about your unique, one-off product requirements and we'll rise to the challenge.

Food Hygiene Is Paramount

We strive to lead the market in the provision of safe, energy efficient commercial refrigeration and foodservice solutions. Our history with, and ongoing commitment to developing relationships with global food and beverage manufacturers ensures we exceed local food safety requirements. Our products constantly and evenly chill food and beverages, which is of vital importance in today's increasingly regulated food market. We share your commitment to providing your customers with safe food and beverage products.

- Don't break the cold chain. Food must be kept at the required storage temperature at all times
- Are you able to clean your refrigeration items easily, without having to move them?
- Is your refrigeration door self-closing?

Dealer & Service Partners

Over time, SKOPE has built relationships with an outstanding team of SKOPE authorised dealers and service agents. Their knowledge of our products is exceptional, and we work closely alongside them to keep them informed of product changes and developments through extensive training programmes. See one of our authorised dealers to plan your design using SKOPE today. For direct feedback, please call our Customer Services line on 1800 121 535.

Ask Yourself. Then Ask SKOPE

- Does your budget allow for commercial refrigeration products as opposed to domestic ones?
- Are your specifications accurate? Have you ordered what is specified, and have you double-checked your measurements and specifications?
- Have you incorporated appropriate space into your design for airflow around refrigeration products?
- In your kitchen design, where are the heat-generating products located in terms of distance from your refrigeration solutions? Is there enough distance between the two types to ensure one does not have a negative effect on the other's productivity?
- As a designer or consultant, do you have an in-depth understanding of your clients' food and beverage refrigeration requirements?
- Is there an off-the-shelf product to fit your specifications, or will you require a one-off product to be designed and manufactured?
- Do you understand the ongoing maintenance requirements for your product in order to achieve maximum performance and longevity from it?
- Have you considered purchasing an extended warranty for your new SKOPE products?

HUGOS Manly, Sydney

"Over the past 17 years, I've used several refrigeration companies, but these days I only use SKOPE, for their exceptional cabinets and customer service. In business it's important to know that you can have faith in your products - with SKOPE, you get that and more."

David Evans Managing Director, Hugos Group

**CUSTOMISED
PRODUCTS
CUSTOMISE
ANY CABINET IN
OUR PRODUCT
RANGE**

Our specialised SKOPE Custom Team are not afraid of challenges. Whatever your aspirations we will work together to find a solution.

Customise almost any of the cabinets in the product range to suit your exacting specifications. The following are some customised options our team has produced, further examples can be seen throughout the Cool Book.

Cabinet Dimensions

All SKOPE cabinet dimensions can be varied, so they can be shallower/deeper, narrower/wider or taller/shorter.

Door Options

All SKOPE cabinets doors can be customised to meet your needs including:

- Glass or solid pass through rear doors
- Frosted glass doors
- Glass viewing panels
- Two or three drawer options
- Barrel locks
- Non-standard door handles
- Stainless steel framed glass doors

Other Customised Options

- **Temperature Variations:** SKOPE cabinets can be customised to meet any non-standard refrigeration temperature requirements between -25°C and ambient.
- **Shelving:** The shelves in any SKOPE cabinet can be replaced with customised chrome or stainless steel shelves.
- **Mounting:** All SKOPE cabinets can be supplied with non standard sized plinths.
- **Remote Systems:** Many SKOPE remote cabinets can be fitted with internal evaporators.

INDICATIVE HORIZONTAL PASS THROUGH FEATURES

Drawing depicts: BB380 2SL*
Pass through cabinet with both front and rear sliding doors.

Drawing depicts: BB380 2SW*
Pass through cabinet with both front and rear swing doors.

Benchtop Options

Our custom team can provide a range of different benchtop options to meet your needs, including:

- Benchtops with ganneries
- Non standard benchtop heights
- Benchtops with overhang at the front, rear or sides
- Splash back benchtops
- Insulated night lids
- Preparation cabinet benchtops to fit any amount of pots less than the numbers specified in this Cool Book at 65mm, 100mm or 150mm deep

Lighting Options

We can customise the lighting in cabinets to meet your needs, including:

- LED lights, lights at the internal rear of the cabinet.
- Light switches in the fascia panel/control panel/kick panel.
- Tinted lighting.

For more information about our customised options, contact SKOPE's Customer Services Team on 1800 121 535. When enquiring about a customised product please advise the product usage and ambient temperature conditions.

Self-closing and self-sealing doors

Replaceable, long-life magnetic door gaskets

The Gastronorm 1/1
and 2/1 series have a
front breathing system,
enabling them to be
built flush against
back & side walls to
make the most of your
valuable space.

Designed to be dependable, this series incorporates 1/1 standard Gastronorm tray and shelf width/depth dimensions and door locks as standard.

Generic Specifications

- Exterior: stainless steel (excluding galvanised steel top)
- Interior: stainless steel sides, rear ducting and coved floor
- Coved floors for easy cleaning
- 2 levels of non-tip, adjustable and removable tray slides and/or shelves w325 x d530mm per door
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz)
- Heated cabinet fascia to eliminate condensation
- Easy to clean, ergonomic horizontal handles
- Self-closing and self-sealing doors
- Key locks on all doors
- Drawers can be locked independently of each other
- Interior long-life LED lighting activated by door opening
- Electronic controller with digital temperature display
- Refrigeration system protected from corrosion by an anti-corrosive blue coating treatment
- Fan-forced ducted air flow for even and consistent temperatures
- System overheat protection fitted
- Insulation: 60mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- Mains isolation box fitted to simplify refrigeration unit isolation and servicing
- Replaceable, long-life magnetic door gaskets
- Flat bottom for easy plinth mounting or castor/leg option supplied at no extra charge when specified
- Optional 35mm stainless steel countertop with a 65mm square edged fascia
- Reduced countertop available on prep cabinets for placement under your counter
- HACCP function – as per standard CAREL feature set

Integral System Specifications

- Left-hand side mounted, removable SKOPE Cyclone™ refrigeration system as standard with right-hand option
- Plumbing free design

Integral Chiller Specifications

- R134a refrigerant (CFC & HCFC free)
- Chiller and chiller drawer product operating temperature adjustable from +1°C to +4°C up to 43°C ambient
- Preparation cabinet operating temperature adjustable from +1°C to +5°C for up to 4 hours in up to 30°C ambient with lids off

Integral Freezer Specifications

- R404A refrigerant (CFC & HCFC free)
- Freezer product operating temperature adjustable from -18°C to -21°C up to 43°C ambient

Remote System Specifications

- Evaporator box and service compartment on left-hand side as standard with right-hand option
- Evaporator drain fitted (requires plumbing)
- Slimmer width, 150mm shorter than integral
- Thermostatic expansion valve fitted as standard (to suit R134a or R404A please specify when ordering)
- Pipework and drain exit inside service compartment at front of unit
- Mains flex exit at rear, 3-core flexible cord with plug
- See Remote Refrigeration System Specifications on page 124 for more information

Drawing Depicts: PG250HCr-2 with optional drawers and mounting options (available as a customised product on Pegasus 2/1 series). Countertop height 35mm. Countertop fascia height 65mm. Adjustable, front-locking swivel castors (115-130 mm high) - total height 831-846mm without countertop. Adjustable legs (150-180mm high) - total height 866-896mm without countertop

Designed to be dependable, this series incorporates 2/1 standard Gastronorm tray and shelf width/depth dimensions and door locks as standard.

Generic Specifications

- Interior: stainless steel sides, rear ducting and coved floor
- Coved floors for easy cleaning
- Easy to clean, ergonomic horizontal handles
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz)
- 2 shelves and adjustable tray slides w530 x d650mm per door as standard
- Self-closing and self-sealing doors
- Replaceable, long-life magnetic door gaskets
- Heated cabinet fascia to eliminate condensation
- Electronic controller with digital temperature display
- Key locks on all doors
- System overheat protection fitted
- Insulation: 60mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- Refrigeration system protected from corrosion by an anti-corrosive blue coating treatment
- Fan-forced ducted air flow for even and consistent temperatures
- Adjustable legs and castors supplied as standard or optional plinth, please specify when ordering
- Optional 50mm square edged stainless steel countertop
- Reduced countertop available on prep cabinets for placement under your counter
- Interior lighting activated by door opening not available as standard
- Front breathing system enabling cabinets to be built flush against back & side walls

Integral System Specifications

- Left-hand side mounted, removable SKOPE Cyclone refrigeration system as standard with right-hand option
- Plumbing free design

Integral Chiller Specifications

- R134a refrigerant (CFC & HCFC free)
- Integral chiller product operating temperature +1°C to +4°C up to 43°C ambient

Integral Freezer Specifications

- R404A refrigerant (CFC & HCFC free)
- Freezer product operating temperature -18°C to -21°C up to 43°C ambient

Remote System Specifications

- Evaporator box and service compartment on left-hand side as standard with right-hand option
- Evaporator drain fitted (requires plumbing)
- Thermostatic expansion valve fitted as standard (to suit R134a or R404A please specify when ordering)
- Pizza and Preparation R404A valve fitted as standard
- Pipework and drain exit inside service compartment at the front of the unit for easy access
- Mains flex exit through base, 3-core flexible cord with plug
- See Remote Refrigeration System Specifications on page 124 for more information

Drawing depicts: PG500HC

Optional 52mm countertop included in cabinet height and 34mm plinth - total height 771. Height excludes legs or adjustable castors. Adjustable front locking swivel castors (115-130mm high) - total height 800-815mm without countertop or plinth. Adjustable legs (150-180) - total height 835-865mm without countertop or plinth.

Designed to be dependable, these upright chillers and freezers incorporate both 1/1 & 2/1 standard Gastronorm tray and shelf width/depth dimensions, enabling integration with other catering equipment.

Generic Specifications

- Exterior: stainless steel (excluding galvanised steel top)
- Interior: stainless steel sides, rear ducting and coved floor
- 5 levels of non-tip, adjustable and removable slides and/or shelves w530mm x d650mm as standard
- Interior designed to hold both 1/1 and 2/1 Gastronorm trays or dishes
- No external back airflow spacer required on chillers or freezers
- Refrigeration system protected from corrosion by an anti-corrosive blue coating treatment
- Easy to access refrigeration unit for easy service and maintenance
- Fan-forced ducted air flow for even and consistent product temperatures
- Fitted with adjustable, front-locking castors as standard
- Electronic controller with digital temperature display
- Solid, stainless steel, self-closing and self-sealing doors
- Key locks on all doors
- Interior long-life LED lighting activated by door opening
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz)
- Easy to clean, ergonomic vertical handles
- Replaceable, long-life magnetic door gaskets
- Heated cabinet fascia to eliminate condensation
- Removable stainless steel side panels for ease of servicing
- Insulation: 60mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)

Integral Specifications

- Removable SKOPE Cyclone™ refrigeration system fitted
- Plumbing free design

Integral Chiller Specifications

- R134a refrigerant (CFC & HCFC free)
- Integral chiller product operating temperature +1°C to +4°C up to 43°C ambient

Integral Freezer Specifications

- Operating temperature adjustable from -18°C to -21°C in 40°C ambient for solid door freezers without lights
- R404A refrigerant (CFC & HCFC free)
- System overheat protection fitted as standard

Remote Specifications

- Thermostatic expansion valve fitted as standard (to suit R134a or R404A please specify when ordering)
- Mains flex exit at rear, 3-core flexible cord with 10 Amp plug
- See Remote Refrigeration System specifications on page 124 for more information

FOOD SERVICE CENTAUR SERIES

SKOPE STANDARD RANGE

Extending the SKOPE offer for busy commercial kitchens and foodservice operations.

The Centaur series has been designed with a heavy duty construction to meet the demands of busy kitchens, cafes and pizza establishments. These energy and cost efficient cabinets ensure you get a reliable product at a great price.

Generic Specifications

- Hygienic, high quality stainless steel interior and exterior surfaces (excluding galvanised steel back & base)
- Fully coved stainless steel interior surfaces for easy cleaning
- Stainless steel benchtop as standard
- Easy plug-in, 10 Amp power (230-240V, 50Hz), via mains flex
- Simple to use, digital temperature display
- Insulated with high density polyurethane foam
- R134a refrigerant in chillers
- R404A refrigerant in freezers
- Removable Cyclone™ style integral refrigeration system on vertical models and side mounted on horizontal models for larger storage capacity
- Indirect airflow for a constant and even temperature
- Integrated, electric condensate evaporator
- Long life and low noise compressor
- Adjustable defrost cycle for quick defrosting and quick recovery
- Removable condenser coil filters on horizontal cabinets
- Additional shelves and extendable castors available as options
- Anti-corrosive coating on evaporator fin coils for increased durability and sanitation
- Interior lighting triggered when door is opened
- Self-closing doors with semi-recessed, ergonomic handles for increased efficiency in kitchens
- Replaceable, long-life magnetic door gaskets
- Adjustable shelving
- Lockable, swivel castors on all models for easy installation, positioning, relocation and cleaning

Operating Temperatures

- Chiller operating temperature: adjustable from +1°C to +4°C in 35°C ambient
- Freezer operating temperature: adjustable from -23°C to -18°C in 35°C ambient
- Sandwich counter operating temperatures: adjustable from 0°C to +4°C in 30°C ambient
- Pizza counter operating temperatures: adjustable from 0°C to +5°C in 30°C ambient

SERIES**

SKOPE PREMIUM RANGE

Innovative feature
Unique 'low temperature
cooking' function

Delicate chilling, strong
chilling, delicate freezing
and strong freezing options

Adjustable Multi Rack[®]
(patented) tray holder

Innovative magnetic self
closing door system

Touch sensitive control

Dynamic mode with
dedicated pre programmed
cycles and the ability for the
user to develop their own
(Multi Fresh only)

HACCP memory and alarm

**Enabling greater food
management, better
organisation, improved
food safety standards
and significant savings.**

The Irinox Multi Fresh system operates in standard or dynamic mode, with the Multi Fresh Plus range including thawing, proofing, personalised cycles, Sanigen® and the new, innovative and unique 'low temperature cooking' function.

Functions

Delicate Chilling

- Chilling of delicate products from +90°C down to +3°C

Hard Chilling

- Very fast chilling of non-delicate products from +90°C down to +3°C

Delicate Freezing

- Freezing of delicate products from +90°C down to -18°C

Hard Freezing

- Rapid freezing of non-delicate products from +90°C down to -18°C

Preservation

- At the end of each cycle the appliance will automatically switch to the required storage temperature (0°C to +2°C for blast chilling and -20°C for blast freezing)

Multi Fresh Specifications

- Delicate chilling, hard chilling, delicate freezing and hard freezing options
- Dynamic mode – dedicated cycles for meat, fish, vegetables, pasta, rice, soup, sauces, bread, chocolate, ice cream and pastry
- Exterior and interior: 304 Stainless Steel
- Insulation: high density injected polyurethane (CFC free)
- HACCP memory and alarm
- Adjustable Multi Rack® (patented) tray holder suitable for GN 1/1, GN 2/1 or 600x400 trays
- Chilling and freezing cycles controlled by the Multi Sensor® probe or timer
- Condenser filter is easily removable for cleaning and servicing
- Status display with intuitive work path controls

- Flashing keys guide the choice of available menus
- Indirect air flow for even and consistent temperatures
- USB connection for work cycle monitoring and easy software updating
- Innovative safe door closing with a dampened magnetic strip
- Automatic preservation at the end of a cycle
- Automatic checking of probe insertion on probe controlled cycles
- Customised recipe book
- The optional Sanigen® system means the entire interior of the cabinet is sanitised
- Can operate in Bakery, Pastry, Gastronomic and Ice-cream modes

Multi Fresh Plus Advantages

- Innovative and unique 'low temperature cooking' function
- 60 dynamic cycles and 20 personalised cycles
- Thawing cycle in controlled temperature environment
- Multiple proofing cycles in controlled leavening environment
- Regeneration, holding and pasteurisation cycles
- Sanigen® total sanitising system as standard

CP Multi Holding Cabinet Specifications

- Positive holding from 0°C to +15°C in between 40-95% relative humidity
- Negative holding from 0°C to -30°C
- Chocolate holding from +14°C to +15°C in 40-50% relative humidity
- Customised setting with the ability to change the temperature and humidity throughout the cycle

MODULAR
COOL ROOM
SYSTEM**

SKOPE PREMIUM RANGE

Internal safety door opening and
manual safety alarm bell fitted

Italian modular
polyurethane rooms
provide a **simple, quick
and flexible** cool or
freezer room solution.

Developed specifically for cool rooms, freezer rooms, combination cool and freezer rooms, production rooms, processing plant both commercial and industrial, MISA can be supplied to suit any modular size requirement.

MISA Advantages

- Simple and smart look modular system construction
- Italian quality and design with both panel and refrigeration systems
- Quick assembly or disassembly time with MISA patented fast fit locking
- Maximise flexibility by adding or deleting panels over time
- A high storage capacity, low foot print solution
- Hinged, sliding, speciality doors, strip curtains, shelving and other accessories available
- Multiple combination rooms can be designed and installed
- The MISA modular Cool or Freezer room system is designed to fit multiple storage or holding requirements. To ensure we provide you with the best possible solution from the MISA range we have developed a form to capture this information, allowing us to offer the right MISA solution for your enquiry. Visit www.skope.com.au to download the form and more information
- MISA patented "fast fit" twin hook cam-lock system; for quick and easy assembly and disassembly
- MSV patented technology; means no panel cutting, riveting or gluing
- KLC 100mm thickness allows flexibility in either Cool or Freezer room size; available in 400mm size increments to suit specific requirements
- Easy to clean; internal and external rounded corners and unique integrated coving provides for superior food grade sanitation
- MISA P250 Roll-in insulated flooring; made from high density reinforced polyurethane and ply covered by 0.7mm galvanised steel with anti-slip plastic coating
- Cool rooms (only) requiring no-floor able to utilise an existing insulated concrete ground floor by incorporating a high density plastic 'U' channel for affixing and sealing walls
- Internal safety release and bell on doors, hinged doors fitted with key locks
- Port relief valves and door heaters standard fixtures on freezer rooms
- Sliding doors with smooth closing system available in a variety of sizes
- MISA is a member of RINA an ISO 9001 Certified Quality System

Generic Specifications

- Cool room operating temperature: adjustable from -2°C to +2°C in 43°C ambient
- Freezer room operating temperature: adjustable from -18°C to -21°C in 43°C ambient
- Patented MVS (MISA Vacuum System) high density isothermal polyurethane modular panel system for excellent insulation and greater energy efficiency. No moisture, liquids are absorbed

Commercial & Industrial Projects

- MISA commercial and industrial rooms available upon request
- Industrial MISA "BETA" and "MAXICELLE" Cold rooms for Turnkey and Project solutions available on request (lead time applies)
- ISO 9001 Certified Quality System.

The MISA modular cool and freezer room system offers future flexibility because it can be expanded or altered to suit changing circumstances.

Flexibility & Efficiency

High-density polyurethane panels provide excellent insulation and energy efficiency, and can be easily assembled and disassembled thanks to MISA's 'Fast Fit' twin hook camlock system.

High Storage Capacity

MISA's room options provide a high storage and shelving capacity while maintaining a low foot print or surface area solution.

Integral FB3

Integral FB

Remote MISA Split MS

Integral Refrigeration

The MISA cool and freezer rooms can be fitted with Tropical 43°C ambient rated and special designed integral MISA Freeblock condensing unit.

MISA Freeblock condensing unit and evaporator is constructed in one piece MVS panel that easily locks into place in a matter of minutes using the MISA cam lock system.

The Freeblock comes with a hermetic compressor, air condenser which is suitable for ambient temperature from 0°C to 43°C, digital controller, light and dissipation tray.

Remote Refrigeration

The MISA cool and freezer rooms can also be fitted with Tropical 43°C ambient rated remote operated condensing units.

Options of the MISA SPLIT, MISA MSG SPLIT, MISAERM and MISAMETIC remote systems are available on request. In 2010 MISA also introduced the latest technology MISA REFREEX energy saving remote system.

Upgraded refrigeration system for significantly improved energy efficiency and performance

Five adjustable, full width, non tip shelves

Interior illuminated by energy efficient, full length, vertical lights

Long life replaceable magnetic door gaskets

GENERAL PURPOSE **SK SERIES**

SKOPE PREMIUM RANGE

Flat light box, illuminated for stylish display and product branding

Electronic controller maintains precise temperature with customer selectable energy optimisation to significantly reduce power consumption

Self-closing, reversible, double-glazed toughened safety glass doors with silver anodised aluminium frames

95mm swivel, front locking castors for easy installation and positioning

Using significantly less energy to run, these cabinets deliver greater performance, efficiency and reliability, as well as improving your bottom line.

The stylish SK-3 series cabinets maximise the latest in SKOPE technology to deliver greater performance, efficiency and reliability than ever before. The cabinet will enhance any product display and merchandising in any café, bar, supermarket or convenience store, while making power savings of up to 50%.

Generic Specifications

- Chiller operating temperature adjustable from +1°C to +4°C in 43°C ambient
- Ducted balanced airflow system (patented) for consistent product temperatures
- High energy efficiency
- Electronic controller with accurate digital temperature display, reflecting product temperature and eliminating door opening fluctuations
- Customer selectable operating modes that include: Standard mode, Power Saving modes, and Elevated mode (for wine, wrapped chocolate, flowers etc)
- Temperature sensing defrost control, for maximum defrost efficiency
- Active alarms. Digital icon display and switched alarm relay, includes condenser overheat pre-warning
- Illuminated interior with energy efficient, full length vertical lights
- Illuminated sign or optional sign replacement panel
- Exterior: galvanised steel (powder coated white) or natural finish stainless steel (excluding galvanised black powder coated top and back)
- Interior: galvanised steel (powder coated white) or natural finish stainless steel
- Light switch to control illumination (via controller)
- Five full width adjustable, non-tip shelves
- Self-closing (adjustable tension), double-glazed, low/e argon filled glass doors with silver anodised aluminium frames
- Reversible doors to suit your display space
- Ergonomic, vertical door handles
- Long life, replaceable magnetic door gaskets
- Top mounted removable/interchangeable SKOPE Cyclone™ refrigeration system
- Built in evaporation tray for efficient disposal of condensate water
- R134a refrigerant in chillers (CFC & HCFC free)
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- HACCP function – as per standard CAREL feature set
- Remote monitoring and communication RS485 link (for large installations and highly valued, stored product), optional via CAREL systems
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz), via mains flex
- Plumbing free design
- 95mm swivel, front locking castors make installation, positioning and relocation easy

✓ High Energy Efficiency

This popular and dependable range of SK cabinets has gained an enviable reputation for offering great performance and reliability.

Generic Specifications

- Chiller operating temperature adjustable from +1°C to +4°C in 43°C ambient
- Electronic controller with digital temperature display
- Exterior: galvanised steel (powder coated white) or natural finish stainless steel (excluding galvanised black powder coated top and back)
- Interior: galvanised steel (powder coated white) or natural finish stainless steel
- Removable SKOPE Cyclone™ refrigeration system
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz), via mains flex
- Five full width adjustable, non tip shelves
- Self-closing, double-glazed, toughened safety-glass doors with silver anodised aluminium frames
- Reversible doors to suit your display space
- Ergonomic, vertical door handles
- Long life, replaceable magnetic door gaskets
- Illuminated interior with energy efficient, full length, vertical lights
- Illuminated sign or optional sign replacement panel
- R134a refrigerant in chillers (CFC & HCFC free)
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- Plumbing free design
- 95mm swivel, front locking castors make installation, positioning and relocation easy

Remote Specifications

- Thermostatic expansion valve fitted as standard (to suit R134a or R404A, please specify when ordering)
- Other refrigerants available if supported by suitable expansion valve
- Evaporator drain fitted (requires plumbing)
- See Remote Refrigeration System Specifications on page 124 for more information

GENERAL PURPOSE TME SERIES

SKOPE STANDARD RANGE

Plain fascia panel in
matching finish

Standard SKOPE
Cyclone™ refrigeration
system

Consistent temperatures
maintained by fan-forced
ducted air flow

Five adjustable shelves
per door as standard

Self-closing, double-glazed,
toughened safety-glass
doors with silver anodised
aluminium frames

**Dependable and reliable,
this series gives you
excellent value for money.**

This series is the single biggest selling multi-purpose storage cabinet series around, enabling you to increase your refrigeration capacity without spending a fortune.

Generic Specifications

- Operating temperature adjustable from +1°C to +4°C in 40°C ambient
- Consistent temperatures maintained by fan-forced ducted air flow
- Thermometer fitted on chiller
- Exterior: galvanised steel (powder coated white, excluding top) or natural finish stainless steel (excluding galvanised black powder coated top and back)
- Interior: galvanised steel (powder coated white) or natural finish stainless steel
- SKOPE Removable Cyclone™ integral refrigeration system
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz), via mains flex
- Five adjustable shelves per door as standard
- Self-closing, double-glazed, toughened safety-glass doors with silver anodised aluminium frames
- Long life, replaceable magnetic door gaskets
- Illuminated interior with full length vertical fluorescent lights
- Long-life LED lighting standard on TME650 and TME1000
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- R134a refrigerant (CFC & HCFC free)
- Plumbing free design
- Front lockable, swivel castors make installation, positioning and relocation easy
- Plain fascia panel in matching finish as standard

Remote Specifications

- Thermostatic expansion valve fitted as standard (to suit R134a or R404A, please specify when ordering)
- Other refrigerants available if supported by suitable expansion valve
- See Remote Refrigeration System Specifications on page 124 for more information

Depth	700	555	Floor Area	1.19m ²

- Remote refrigeration duty 1200 Watts at -5°C SST
- Two vivid, full length, vertical centre pillar lights (2 x 35 Watts)
- Minimum 200mm clear ventilation space required above cabinet top

GENERAL PURPOSE VF SERIES

SKOPE PREMIUM RANGE

Upgraded refrigeration system
for significantly improved energy
efficiency, performance and
noise reduction

Door switch and manual light
switch to further reduce energy
consumption

Up to 35% more efficient than
the previous TMEF650 model

Door alarm and ambient alarm
for greater peace of mind

SKOPE Cyclone freezer™
integral refrigeration system

**Freezers designed to
significantly improve
energy efficiency,
performance and noise
reduction.**

Optional illuminated LED
sign panel to brand and
advertise your products

Stabilised temperature
display minimises
fluctuations from door
openings, accurately
displaying actual product
temperature

Electronic controller
maintains precise
temperature control

Interior illuminated by
energy efficient LED
side light

This new range of energy efficient premium freezers has been designed with improved features to deliver greater performance, efficiency and reliability than ever before.

Generic Specifications

- Upgraded refrigeration system for significantly improved energy efficiency, performance and noise reduction
- Up to 37.5% more efficient than the previous TMEF1000 model
- Operating temperature adjustable from -18°C to -21°C in 40°C for glass door freezers
- Ducted balanced airflow system for consistent product temperatures
- SKOPE cyclone freezer™ integral refrigeration system
- Electronic controller with stabilised temperature display
- Easy plug in, 10 Amp power supply
- Self-closing, triple glazed, toughened safety glass doors
- 5 adjustable shelves per door as standard
- R404A Refrigerant
- Insulation: 50mm polyurethane foam
- Front lockable, swivel castors make installation, positioning and relocation easy
- Optional illuminated LED sign panel
- Plumbing free design
- Door alarm and ambient alarm as standard
- Door switch and manual light switch as standard

Freezer Specifications

- Operating temperature adjustable from -18°C to -21°C in 40°C for glass door freezers
- Self-closing, triple glazed, heated toughened safety glass doors
- R404A Refrigerant
- Electronic Controller
- Insulation: 50mm thick polyurethane foam

Remote Specifications

- Thermostatic expansion valve fitted as standard to suit R404A
- See Remote Refrigeration System Specifications on page 124 for more information

GENERAL PURPOSE **B** SERIES

SKOPE STANDARD RANGE

Optional 200mm illuminated
sign panel to brand and
advertise your products

Visual clarity maintained by warm
air blown up the glass doors

Improved energy efficiency
with upgraded SKOPE Cyclone™
refrigeration system

Lower overall height
gives you more flexibility
to place the cabinets

Removable, bottom
mounted refrigeration
system for easy servicing

**Versatile, energy efficient,
bottom mounted chillers,
designed to fit into spaces
where height is restricted.**

This bottom mounted series is designed to fit into confined spaces. The easy to access refrigeration unit makes servicing and maintenance a breeze, and the hot air from the condenser unit is blown up the glass doors to reduce condensation.

Generic Specifications

- Operating temperature adjustable from +1°C to +4°C in 43°C ambient
- Consistent temperatures maintained by fan-forced ducted air flow
- Electronic controller with digital temperature display
- Exterior: galvanised steel (powder coated white) or natural finish stainless steel (excluding galvanised steel back and top)
- Interior: galvanised steel (powder coated white) or natural finish stainless steel
- Self-closing, double-glazed, toughened safety-glass doors with silver anodised aluminium frames and vertical full height ergonomic handles
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz), via mains flex
- 5 adjustable plastic coated shelves as standard
- Energy efficient, interior vertical side lights
- Replaceable, long-life magnetic door gaskets
- Bottom mounted removable SKOPE Cyclone™ refrigeration system
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- R134a refrigerant (CFC & HCFC free)
- Optional 200mm high, illuminated sign panel, please specify when ordering

Generic Specifications for B600-2 & B1200-2

- Stainless steel bottom spillage trays.
- Numbered shelf support strips to assist planogram setup.
- Fully removable cassette for easy servicing and transportation.
- EMS Advanced controller with fuzzy logic to ensure chiller learns to operate to maximum energy efficiency.
- High efficiency, high speed EC evaporator fan motor.
- High efficiency EC condenser fan motor, with a reverse function to reduce condenser cleaning frequency.
- Thermal expansion valve for optimised refrigerant flow control.
- Large highly efficient refrigerant heat exchangers.
- Easily accessible condenser coil for maintenance
- Not available in NZ

Integral Specifications

- Hot air from the condenser unit is blown up the glass door, reducing condensation and ensuring product visibility within the cabinet
- Plumbing free design

Remote Specifications

- Ambient air is blown up the glass door, reducing condensation and ensuring product visibility within the cabinet
- Thermostatic expansion valve fitted as standard (to suit R134a or R404A, please specify when ordering)
- See Remote Refrigeration System Specifications on page 124 for more information

These energy efficient, compact countertop and vertical glass door chillers and freezer have been designed simply to suit everyday needs at a low cost.

Counter Top Chiller Specifications

- Low energy consumption – uses 3.5kW/24hrs
- Operating temperature +1°C to +4°C in 32°C ambient
- Insulation (HB50 & HB80): 40/70mm thick polyurethane foam
- Insulation (HB110): 35/70mm polyurethane foam
- Refrigerant R134a
- Exterior: white powercoated on galvanised steel
- Interior: white plastic
- 10 Amp power supply
- Low/e, toughened safety glass door
- Forced air ventilation
- Automatic defrosting
- Adjustable foot stand
- Internal light
- Plumbing-free design
- Key lock on door as standard (excluding HB50)

Counter Top Freezer Specifications

- Low energy consumption – uses 3.28kW/24hrs @25°C
- Operating temperature -14°C to -23°C in 30°C ambient
- Insulation: 60-80mm polyurethane foam
- Refrigerant R134a / 155 grams
- Right-hand hinged (non reversible), self-closing door with triple glazed heated safety glass
- 10 Amp power supply
- Adjustable foot stand
- Internal light
- Plumbing-free design
- Static air ventilation

Vertical Chiller Specifications

- Operating temperature +2°C to +5°C in 30°C ambient
- Insulation: 30/70 polyurethane foam
- Refrigerant R134a
- Interior and exterior: white powder coated on galvanised steel
- 10 Amp power supply
- Illuminated sign panel
- Adjustable thermostat
- Self-closing, triple glazed swing door
- Internal light
- Plumbing free design

GENERAL PURPOSE COUNTER LINE SERIES

SKOPE STANDARD RANGE

**Ideal for restaurants,
commercial kitchens
and foodservice areas
with non-Gastronorm
chiller requirements.**

This series is available in a range of depths, doors and installation heights, making it the perfect solution for restaurants, commercial kitchens and foodservice areas with non-Gastronorm chiller requirements.

Generic Specifications

- Swing door cabinets operating temperature adjustable from +1°C to +4°C in 40°C ambient
- Sliding door cabinets operating temperature adjustable from +1°C to +4°C in 32°C ambient
- Consistent temperatures maintained by fan-forced ducted air flow
- Electronic controller with digital temperature display
- System overheat protection fitted as standard
- Exterior: galvanised steel (powder coated white or optional black) or natural finish stainless steel (excluding galvanised steel top and base)
- Interior: galvanised steel (powder coated white or optional black) or natural finish stainless steel
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz), via mains flex
- Removable sliding doors and extruded track for easy cleaning
- Refrigeration system protected from corrosion by an anti-corrosive blue coating treatment
- Left-hand side mounted service compartment as standard
- Two layers of adjustable shelves per door as standard
- Full length, horizontal fluorescent lights and interior light switch
- Full length, ergonomic door handles
- Long life, replaceable magnetic door gaskets
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- R134a refrigerant (CFC & HCFC free)
- Adjustable legs and swivel castors for easy installation, positioning and relocation

- Cabinets supplied without a countertop as standard (optional 25mm countertop with 65mm fascia)
- Choice of two depths increase space-saving opportunities: Counterline series depth is 680mm, Slimline series depth is 600mm

Self-closing door options

- Swing glass doors with double glazed toughened single low/e safety glass available with silver or black anodised finish
- Sliding glass doors with double glazed toughened single low/e safety glass available in silver or black anodised finish
- Swing solid doors available in stainless steel, white or black to match cabinet finish

Integral Specifications

- Left-hand side mounted, removable SKOPE Cyclone™ refrigeration system as standard with right-hand option
- Plumbing free design

Remote Specifications

- Evaporator box and service compartment on left hand side as standard with right-hand option
- Pipework and drain exit inside service compartment. Rear exit access panel
- Thermostatic expansion valve fitted as standard (to suit R134a or 404A, please specify when ordering)
- See Remote Refrigeration System Specifications on page 124 for more information

Drawing Depicts: CL400 2SW integral with optional mounting heights

Optional countertop height 25mm. Countertop fascia height 65mm.

Adjustable front locking swivel castors (115-130mm high) – total height 820-835mm without countertop.

Adjustable legs (150-180mm high) – total height 875-905mm without countertop.

GENERAL PURPOSE BACKBAR SERIES

SKOPE PREMIUM RANGE

**Specifically designed
for bars with adjustable
shelf heights to fit a
range of bottle shapes
and sizes.**

These stylish horizontal cabinets with an external evaporator offer you more internal space than any other, saving you re-stocking time and giving you more selling time.

Generic Specifications

- Swing door cabinet operating temperature adjustable from +1°C to +4°C in 40°C ambient
- Sliding door cabinet operating temperature adjustable from +1°C to +4°C in 32°C ambient
- Consistent temperatures maintained by fan-forced ducted air flow
- Electronic controller with digital temperature display
- System overheat protection fitted as standard
- Exterior galvanised steel (powder coated white or optional black) or natural finish stainless steel (excluding galvanised steel top)
- Interior: galvanised steel (powder coated white or optional black) or natural finish stainless steel
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz), via mains flex
- Removable sliding doors and extruded track for easy cleaning
- Refrigeration system protected from corrosion by an anti-corrosive blue coating treatment
- Left-hand side mounted service compartment as standard
- Two adjustable shelves per door as standard
- Full length, horizontal fluorescent lights and interior light switch
- Full length, ergonomic door handles
- Long life, replaceable magnetic door gaskets
- Heated wire in cabinet fascia to prevent condensation
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)

- R134a refrigerant (CFC & HCFC free)
- Adjustable legs and swivel castors for easy installation, positioning and relocation
- Cabinets supplied without a countertop as standard (optional 25mm countertop, please specify when ordering)

Self-closing door options

- Swing glass doors with double glazed toughened single low/e safety glass available with silver or black anodised finish
- Sliding glass doors with double glazed toughened single low/e safety glass available in silver or black anodised finish
- Swing solid doors available in stainless steel, white or black to match cabinet finish

Integral Specifications

- Left-hand side mounted, removable SKOPE Cyclone™ refrigeration system as standard with right-hand option
- Plumbing free design

Remote Specifications

- Evaporator box and service compartment on left hand side as standard with right-hand option
- Pipe work and drain exit inside service compartment. Rear exit access panel
- Thermostatic expansion valve fitted as standard (to suit R134a or 404A, please specify when ordering)
- See Remote Refrigeration System Specifications on page 124 for more information

GENERAL PURPOSE FOOD DISPLAY SERIES

SKOPE PREMIUM RANGE

Low noise levels so your customers and business are not disturbed

Easy to use controls with on/off light switch for reduced power consumption

Safety and hygiene are key, with toughened safety glass, internal coved corners, lockable castors and no sharp edges

Diffused lights that do not affect the taste or look of food with no glare to customers

Mirrored doors for increased product depth

**High performing,
energy efficient cabinets
designed for optimum
product presentation
and ease of use.**

Constant chilled air and high humidity keep food fresher for longer, reducing costs associated with unnecessary food wastage. Food is displayed at its best, attracting customers through lighting, mirrored doors for product depth and tilt adjustable display shelves.

Generic Specifications

- Average operating temperature +3.5°C in 32°C ambient
- Consistent temperatures maintained by fan forced ducted air flow
- Electronic controller with digital temperature display
- Easy to use unit and lighting on/off switches
- System overheat protection fitted as standard
- Exterior stainless steel (excluding galvanised steel base)
- Interior: stainless steel
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz), via mains flex
- Removable sliding doors, door track, shelves, trays and coved internal corners for easy cleaning
- Two double glazed doors with internal mirror finish
- Two tilt adjustable shelves, with wire trays (w310 x d450mm) as standard
- FDM900 4 x wire trays plus fixed bottom shelf (w630 x d440mm), FDM1200 6 x wire trays plus fixed bottom shelf (w930 x d440mm), FDM1500 8 x wire trays plus fixed bottom shelf (w1230 x d440mm)
- Three T5 fluorescent tubes as standard
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- Rotating castors for easy installation, positioning and relocation (rear castors lockable only)

Integral Specifications

- R134a refrigerant (CFC & HFC free)
- Plumbing free design

Remote Specifications

- Plumbing required for drainage
- Thermostatic expansion valve fitted as standard (to suit R134a or 404A, please specify when ordering)
- See Remote Refrigeration System Specifications on page 124 for more information

GENERAL PURPOSE GLASS CHILLER SERIES

SKOPE STANDARD RANGE

Specifically designed
to support efficient
bar service.

This remote Glass Chiller supports efficient bar service by quickly chilling glasses straight from the dishwasher ensuring glasses are constantly cold.

Generic Specifications

- Operating temperature +1°C to +4°C in 40°C ambient
- Electronic controller with digital temperature display with on/off switch and neon power indicator
- Exterior: stainless steel (excluding galvanised steel top and base)
- Interior: stainless steel
- Easy plug-in 10 Amp power supply (230-240V, 50Hz), via mains flex
- Self-closing glass door with double glazed toughened single low/e argon filled safety glass
- Reversible door to suit your space
- Left hand side mounted service compartment
- Three shelf runners, to hold w14" x d17" or w14" x d14" glass racks (glass racks not included)
- Full length, ergonomic door handle
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- Adjustable legs as standard, also suitable for plinth mounting

Remote Specifications

- Plumbing required for drainage
- Thermostatic expansion valve fitted as standard (to suit R134a or 404A, please specify when ordering)

Chris Houliaras Head Chef

Night blind reduces power consumption

OD1100 maintains cold product at 25°C and 60% relative humidity

Maintenance-free refrigeration system (patent pending) that uses a non-blocking condenser

Four angled or flat shelves and one angled bottom shelf provide quick and easy access to products

Easy plug-in, 10 Amp power supply

Removable front access SKOPE Cyclone™ refrigeration system makes servicing a breeze

Intuitive electronic controller for precise temperature control and comprehensive alarming

CONVENIENCE STORE **OPEN DECK SERIES**

SKOPE PREMIUM RANGE

Removable top moulding
and kick panels provide
plenty of space to brand
and advertise your products

Display case illuminated by
energy efficient fluorescent
lights to optimise your
product presentation

Automatic frost detection and
defrosting cycle for optimal defrost

High capacity stainless steel
condensate tray is easy to
remove for cleaning

Rotating, lockable castors

**Providing optimal
display space for
your products and
increasing your high-
margin impulse sales.**

These innovative open deck chillers have been designed to fit in locations to target impulse shoppers. The larger OD1100 chiller gives you the versatility to easily swap out your existing glass door chiller, while the smaller OD400 chiller has been designed for the end of gondolas or checkouts.

Generic Specifications

- Operating temperature: 0°C to +5°C in 25°C ambient, up to 60% relative humidity

Durable exterior and interior surfaces

- Exterior: white or black powder coated on galvanised steel
- Interior: white or black powder coated on galvanised steel
- Maintenance-free refrigeration system (patent pending) that utilises a unique non-blocking condenser

Intuitive electronic controller for precise temperature control and comprehensive alarming

- Alarm sounds before the chiller temperature gets too high, even in adverse conditions
- Power save mode for non-perishable products
- Automatically detects and defrosts the chiller for optimal defrost
- Display case illuminated by energy efficient fluorescent lights to optimise your product presentation
- Removable front access SKOPE Cyclone™ refrigeration system makes servicing a breeze
- Easy plug-in, 10 Amp power supply (230-240V, 50Hz), via mains flex
- High capacity stainless steel condensate tray prevents any water leaking onto the floor and is easy to remove for cleaning

- Removable top sign and kick panels on OD1100 provide plenty of space to brand and advertise your products
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)
- R404A refrigerant (CFC & HCFC free)
- Optional gravity feed shelving and ticket strips
- Optional security grille for safe storage of products after hours

OD1100 Specifications

- Four adjustable shelves and a fixed bottom shelf provide capacity for 345 x 600ml bottles (75 bottle facings)
- Rotating, lockable castors and a generous ground clearance make it easy to install and move
- Night blind reduces power consumption

OD400 Specifications

- Two adjustable shelves and a fixed bottom shelf provide capacity for 120 x 600ml bottles (30 bottle facings)
- Cabinet drain captures any spillage, making it easy to keep clean
- Rollers for easy movement

CONVENIENCE STORE YARRA SERIES

SKOPE PREMIUM RANGE

Top mounted corporate fascia panel or optional illuminated sign

Triple-glazed, heated, toughened safety-glass doors and optional solid rear doors

Five cantilevered angled or flat shelves

Vertical fluorescent lights on both sides of each door

Energy saving interior light switch

Removable condenser filter for easy maintenance

Condenser air enters at the front and exits from the top, ensuring cooler operating temperatures

Large display area provided by extra cabinet height and width

Screw down cabinet stabiliser feet and swivel, front-locking, adjustable castors

Designed specifically for 'wall-of-refrigeration' product display and storage needs of convenience stores.

Ideal for stores with high volume requirements and high product turnover. These units are easy to install and move around when you want to alter your store layout.

Generic Specifications

Durable exterior and interior surfaces

- Exterior: white or black powder coated on galvanised steel
- Interior: white or black powder coated on galvanised steel

Electronic controller with digital temperature display includes:

- Temperature and refrigeration alarms
- HACCP control and logging functionality
- Real-time clock (for HACCP and defrost control)
- Condenser air enters at the front and exits from the top, ensuring cooler operating temperatures
- Fan-forced ducted airflow provides fast temperature pull-down and maintains an even product temperature
- Service and exchange disruption minimised by easily removable SKOPE Cyclone™ refrigeration system
- Easy plug-in 10 Amp power supply (230-240V, 50Hz), via mains flex for 1 door, 2 x 10 Amp power supply for 2 door
- Hygienic, easy to clean surfaces
- Five cantilevered angled or flat shelves to maximise product display facings and optimise storage capacity
- Top mounted corporate fascia panel or optional illuminated sign
- Large display area provided by extra cabinet height and width
- Triple-glazed, heated, toughened safety-glass doors and optional solid rear doors
- Optimal product illumination with vertical fluorescent lights on both sides of each door
- Energy saving interior-light switch

- Screw down cabinet stabiliser feet and swivel, front-locking and adjustable castors (115mm – 130mm high)
- Heated door frame enables the cabinet to perform at high humidity levels
- Cabinet can be switched from chiller to freezer unit by replacing the SKOPE Cyclone™ refrigeration system
- Insulation: 50mm thick, high density cyclo-isopentane polyurethane foam (CFC, HCFC & HFC free)

Chiller Specifications

- Operating temperature adjustable from +1°C to +4°C in 43°C ambient
- R134a refrigerant (CFC & HCFC free)
- Current draw of 5.8 Amps per chiller door module
- Optional solid rear doors on the chillers provide a convenient method for re-stocking shelves and minimise customer disruption

Freezer Specifications

- Operating temperature adjustable from -18°C to -23°C in 32°C ambient
- R404A refrigerant (CFC & HCFC free)
- Current draw of 7.6 Amps per freezer door module
- Door switches to control internal fans and reduce energy consumption

Remote Refrigeration Specifications

- Thermostatic expansion valve fitted as standard (to suit R134a or R404A, please specify when ordering)
- Other refrigerants available if supported by suitable expansion valve
- See Remote Refrigeration System Specifications on page 124 for more information

GET THE MOST FROM YOUR REFRIGERATION CABINET MINIMISE POWER CONSUMPTION

The correct setup, positioning, cleaning, maintenance and safe operation of your SKOPE chiller and freezer cabinets are essential to ensure you are getting the most from your refrigeration cabinets and minimising your power consumption.

The following information will help to ensure you get the best possible performance from your SKOPE products. For more detailed remote chiller and freezer installation instructions, see page 118.

For further product installation details, please contact the SKOPE Customer Services Team.

Initial Setup and Operation

1. Read all documentation (instructions/manuals) received with the cabinet before positioning it.
2. Position the cabinet close to its final location adhering to the installation and ventilation guidelines.
3. Remove all packaging materials and transit bolts and ensure air inlets and exhausts are clear.
4. Assemble any necessary parts.
5. Check the cabinet's rating and the Amp capacity of the power outlet before plugging it into a suitable power supply and turning it on.
6. Check the operation of lights and SKOPE Cyclone™ refrigeration system.
7. **Verify the operation of the compressor, evaporator and condenser fans:**
 - Listen for compressor 'switch-on'.
 - Check internal air movement around the system.
 - On some models the compressor and the condenser fan will switch off when the internal operating temperature is reached.
8. Position the shelves to suit and engage shelf clips in support strips.
9. Ensure there is sufficient air space around the contents of the cabinet and stock does not overhang the edges of the shelves, so air can circulate inside the cabinet at all times.
10. Keep air vents and ducts clear.
11. Ensure that the door gaskets form a good seal with the cabinet.

Positioning

1. Position the cabinet to minimise exposure to excessive temperatures, avoiding direct sunlight, warm draughts and kitchen equipment that produces high temperatures e.g. broilers, grillers, ovens and fat fryers.
2. Some cabinets have unique installation requirements. Always check and follow the installation instruction documents provided with each cabinet.
3. Avoid positioning the cabinet in locations where there is high grease and fat content in the air to prevent condenser coil blockage. If this is not possible, implement an appropriate condenser coil cleaning program as preventative maintenance.
4. **Ensure that there is adequate ventilation around the cabinet to release heat build-up. A lack of ventilation will result in poor efficiency, excessive power bills, failed operation and/or a limited refrigeration unit lifespan.**
 - Cabinets with a top mounted SKOPE Cyclone™ refrigeration system require a minimum clearance of 200mm above the top of the unit.
 - Cabinets with a bottom mounted SKOPE Cyclone™ refrigeration system require unobstructed airflow into the under side of the cabinet. Nothing must be placed directly in front of or beneath the cabinet.
 - Air movement around prep cabinets must not exceed 0.3m/s. Excessive air movement will cause failure of the air curtain.
 - Prep cabinets must not be situated where they will be affected by air conditioning outlets, ventilation fans or air recirculation fans as they will compromise the airflow.
5. Ensure that adequate clearance has been allowed for door swing.
6. Position the cabinet on a level surface for stability and to ensure the pretensioned torsion system doors shut and seal correctly.

Cleaning

1. Inspect the cabinet regularly and clean it at least once a week or as required.
2. Empty the product from the cabinet.
3. Disconnect the cabinet from the power supply (switch off and unplug).
4. **Check the condenser monthly and clean if necessary. The condenser is the finned radiator that is external to the insulated evaporator box.**
 - If the air path through the condenser fins has any visual restriction, use a vacuum cleaner or brush to clear the condenser. SKOPE recommends that the condenser is checked and cleaned by an authorised SKOPE refrigeration mechanic.
5. Wipe the interior and exterior of the cabinet with soapy water.
6. Wash away soap residue.
7. Wax the exterior with automobile polish for extra protection.
8. Do not use abrasive cleaners.
9. Check and clean the door seal gaskets. These may be wiped down with a damp cloth. Ill-fitting door seal gaskets will reduce a cabinet's efficiency and increase power consumption. If the door seal gaskets are not sealing, call SKOPE to arrange a replacement.
10. Reconnect to the power supply and switch on.

For more information on the cleaning required, please see the service manual specific to each product.

Maintenance and Servicing

SKOPE recommends that all cabinets are checked and cleaned by a service professional to ensure you are getting the most from your cabinet.

To ensure your cabinet is operating to its optimum a SKOPE service professional will:

1. Ensure the cabinet is being held at the required temperature, and if necessary, adjust the thermostat controller.
2. Check and clean the condenser. If the condenser coil is badly blocked, the unit must be cleaned out with compressed air and may require the unit to be moved out doors. Dirty condensers can lead to an increase in temperature and power consumption and in some cases compressor and component failure.

3. Check all door gaskets are sealing correctly, adjust door hinges for better alignment, and replace gaskets if necessary.
4. Ensure all the lights are operating correctly.
5. Ensure the condensate tray is clean.
6. Inspect the evaporator coil to ensure there is no excess ice build-up.
7. Check the condition of the power supply cord.

Routine maintenance will reduce the need for major service work on the SKOPE Cyclone™ refrigeration system. If required, the removable externally fitted SKOPE Cyclone™ can be easily exchanged for repair at minimum cost and disruption to you.

Safety Information

1. Disconnect cabinets from the mains power supply before attempting any servicing, maintenance or cleaning.
2. Do not use an appliance for anything other than its intended use.
3. Do not overload the power supply (see the unit's serial rating label).
4. Use only on voltage specified on the rating plate or in the instructions.
5. Ensure adequate ventilation of the refrigeration system.
6. Do not touch moving parts.
7. Do not obstruct grilles or exhaust.
8. Do not probe any opening.
9. Replace the power supply cord if damaged (where special terminations or preparation is required, contact a service agent).

For details on your nearest service professional, call SKOPE's freephone number 1800 121 535.

REMOTE REFRIGERATION SPECIFICATIONS

Definitions

A remote system excludes a condensing unit (i.e. compressor, condenser assembly etc) and includes the evaporator assembly, electronic controller (excludes TME chiller), TX valve and drain as a standard. Remote system models are indicated by the use of the letter 'r' after the model name e.g. SK650r-2 and SKF1000r.

Installing a SKOPE cabinet with a remote refrigeration system requires adding a condensing unit. SKOPE does not include a condensing unit with their models as its selection depends on varying factors, including:

- Heat load
- Refrigeration load
- Variable operating conditions
- Refrigeration tube diameter and length
- Location and ventilation

A refrigeration installer must check these factors and is responsible for the condensing unit performance and component selection.

Please note: All SKOPE Blast Chillers are supplied with a remote condensing unit capable up to 40m. Remote unit installation is not included in the cost.

SKOPE Specific Remote System Requirements

Installation and Commissioning:

1. A qualified refrigeration engineer must select the correct condensing unit and associated components based on the customer requirements and application.
2. The refrigeration condensing unit must be installed and commissioned by a suitably qualified refrigeration engineer to appropriate standards and a high level of workmanship.
3. The installer must confirm that the controller program is suitable for the required application.
4. The liquid and suction connection pipes are run to the outside of the evaporator box housing, and the suction line should be insulated.
5. SKOPE recommends that the condensing unit be fitted with a receiver. The condensing unit must have dual (high and low) pressure switches fitted.

NB: Multiple cabinets can be run off a single large condensing unit. SKOPE recommends, however, that freezer units use a single condensing unit per cabinet.

Ventilation

1. All refrigeration and freezer cabinets must have a 200mm ventilation space above the SKOPE remote refrigeration system. This applies to all ambient and humidity conditions and is necessary to prevent any condensation forming on the evaporator box and cabinet top.
2. If installation does not allow for the minimum clearances, then an additional fan must be fitted. The fan must have a minimum airflow of 50 litres per second to create air circulation around the evaporator unit. SKOPE does not offer a fan kit for this application.

Drainage

1. A condensate drain must be run from the cabinet to a waste outlet.
2. Ensure the cabinet is level.
3. Ensure the drain is trapped with adequate fall. It must have a minimum fall of 50mm per 1 linear meter of drain.
4. Venting the drain may be required for restrictive run.
5. SKOPE recommends that a hard PVC drain tube is fitted to all remotes to ensure effective drainage. This will reduce the possibility of the drain hose sagging over time, which reduces the effectiveness of the drain.

Electrical

1. SKOPE remote chillers require a 10 Amp (230-240V, 50Hz) supply socket. Other voltages available on request.
2. SKOPE remote chillers are fitted with a mains flex and plug.
3. SKOPE remote freezers are not supplied with a mains flex.
4. The condensing unit requires a dedicated power supply. The type of supply required will be dependent on the type of condensing unit selected.
5. Any new or additional wiring to the cabinet must be performed according to local wiring regulations. Refer to the wiring diagram label fixed to the lid of the evaporator box.

Chiller Rating Conditions

- Remote nominal operating ambient temperature: 32°C (43°C maximum)
- Remote product operating temperature: +1°C to +4°C

Condensing unit should be rated at:

- -5°C SST (Saturated Suction Temperature)
- "Medium Temperature - High Start Torque" Compressor
- Operation basis: 18 hours for every 24 hours

Freezer Rating Conditions

- Remote nominal operating ambient temperature: 32°C (40°C maximum)
- Remote product operating temperature: -18°C to -21°C

Condensing unit should be rated at:

- -30°C SST (Saturated Suction Temperature)
- "Low Temperature - High Start Torque" Compressor
- Operation basis: 18 hours for every 24 hours

Preparation and Pizza Rating Conditions

- Remote nominal operating ambient 30°C (30°C maximum)
- Remote product operating temperature: +1°C to +4°C

Condensing unit should be rated at:

- -15°C SST (Saturated Suction Temperature)
- "Low/ Medium Temperature – High Start Torque" Compressor
- Operation basis: 18 hours for every 24 hours

SK650r - illuminated sign panel removed from front of remote unit.

1. Suction and Liquid line termination points.
2. Solenoid Valve: optional on all remotes.
3. Drain Tube: 600mm long flexible drain hose.
4. Electronic Controller.

GLOSSARY

Model Names

1. **Preparation or prep cabinets:** chiller cabinets designed for food preparation. These cabinets have a ducted well in the top rear of the flat benchtop that pans of prepared ingredients sit in. An air curtain blows air over the pans to ensure even temperatures and that food safety standards can be met.
2. **Lowline chiller cabinets:** low lying cabinets designed to hold hot cooking equipment on the top.
3. **Pizza cabinets:** chiller cabinets designed for food preparation. These cabinets have a ducted well in an angled raised section at the top rear of their benchtop that pans of prepared ingredients sit in. They also have a flat work area at the top front of the cabinet. An air curtain blows air over the pans to ensure even temperatures and that food safety standards can be met.
4. **Under counter cabinets:** cabinets designed to fit under counters or benchtops.
5. **Backbar cabinets:** chiller cabinets designed for bottle storage behind and/or under bars.
6. **Top mounted cabinets:** the refrigeration unit is mounted at the top of the cabinet.
7. **Bottom mounted cabinets:** the refrigeration unit is mounted at the bottom of the cabinet.

Option Definitions

1. **Integral:** a cabinet with a self contained refrigeration system.
2. **Remote:** a cabinet with a separately located refrigeration condensing unit that is not supplied by SKOPE.
3. **Benchtop fascia height:** the height of the front of the benchtop. This height is sometimes different to the overall height added to a cabinet by the benchtop.
4. **Benchtop height:** the height of the benchtop that is added to a cabinet.
5. **S/S:** Stainless Steel.
6. **Solid door:** a metal, foam filled solid door that cannot be seen through.
7. **Sign replacement panel:** a flat metal panel to replace a light sign on top of some vertical cabinets.
8. **Treated coil:** a protective coating on the coil to prevent corrosion, which is caused by uncovered foods, especially fish, eggs, mayonnaise and dressings.
9. **Tropical specification:** the cabinet is designed to operate in very high humidity (up to 85% relative humidity).

Dimensional Tolerances

When specifying chillers or using SKOPE cabinets in designs please allow the following dimensional tolerances.

Linear Dimensions	General Cabinet Dimensions	Length of Multiple Cabinets	
		At each joint	At each end wall
≤ 1 metre	±5mm	±5mm	+15mm
≥ 1 metre	+10mm -5mm	+10mm -5mm	+15mm

10. **Gastronorm 1/1 trays:** Gastronorm standard sized catering trays 530mm long x 325mm wide.
11. **Gastronorm 2/1 trays:** Gastronorm standard sized catering trays 650mm long x 530mm wide.

Glass Terminology

1. **Insulating glass:** this is double glazing. Two or more panes of glass are joined with a sealed air gap between them.
2. **Heated safety glass:** glass which has an electrically heated film attached to remove condensation in the harshest environments.
3. **Argon gas:** a colourless and odourless gas used to fill the airspace between panes of insulating glass. The addition of argon gas increases the thermal performance of a window by minimising heat transfer.
4. **Low/e:** stands for "low emissivity". Low/e glass is safety glass coated with a clear metal oxide film to reduce heat transfer.
5. **Double low/e glass:** two panes of glass coated with a clear metal oxide film to reduce heat transfer.

Glass Option Definitions

1. **Safety glass:** standard glass used on SKOPE chillers. Air filled, double-glazed toughened safety glass.
2. **Low/e:** one pane of safety glass and one pane of low/e glass. Low/e provides more insulation than standard safety glass.
3. **Double low/e argon:** two panes of low/e glass, argon gas filled. Double low/e argon glass provides more insulation than low/e glass.
4. **Double glazed heated safety glass:** two layers of safety glass with a heated film used on chiller cabinets.
5. **Triple glazed heated safety glass:** three layers of safety glass with a heated film used on freezer cabinets.

Temperature Definitions

1. **Product operating temperature:** the temperature of the product stored within the cabinet.
2. **Operating ambient temperature:** the maximum temperature of the environment that the cabinet can operate in and maintain the product temperature.
3. **Relative Humidity or RH:** is the ratio of the amount of water vapor in the air at a specific temperature to the maximum amount of water that the air could hold at that temperature, expressed as a percentage.
